<sup>1</sup>"During the past 2 years, has your state provided any funding for or offered staff development on each of the following topics to school nurses: (a) nutrition and dietary behavior counseling, including weight management, (b) eating disorders prevention, (c) physical activity and fitness counseling, (d) pregnancy prevention, (e) HIV prevention, (f) STD prevention, (g) suicide prevention, (h) tobacco use prevention, (i) alcohol or other drug use prevention, (j) violence prevention, for example bullying, fighting, or homicide, or (k) accident or injury prevention?" (State Health Services Questionnaire, Items 46a-k)

<sup>2</sup>Although the SHPPS 2000 questionnaires used the word "accident" because it is familiar to many people, public health officials prefer the word "injury" because it connotes the medical consequences of events that are both predictable and preventable.
